Environmental Statement

EaCo Chem Inc. is a developer of cleaning solutions for the masonry, construction and the transportation industries since 1987. www.eacochem.com

Masonry cleaning products are designed to be biodegradable when rinsed into earthen ground or sanitary sewer disposable when cleaning products are used in the manner stated on the product data and safety data sheets. Use a method that removes large particles (sand, grit...) prior to sanitary sewer disposing.

Degreasing products, containing the oil and grease need to be collected and disposed of properly to environment waste company.

Coating removal products (paints, sealers...) need to be collected and disposed of properly to environment waste company.

Federal, state, and local authorities regulate disposal of waste. In order to ensure compliance with these agencies, contact the proper local authorities for regulations regarding proper waste disposal methods in your area. Never release products or rinse water into storm drains, which is direct discharge into waterways such as creeks, streams, rivers, lakes....

The Safety Data Sheet (SDS) information can be used to accurately indicate the hazards present in the product when contacting the sanitary treatment plant. The information given is in good faith. Hazards associated with the soil removed by the product are beyond our control. Final determination of the suitability of any material is the sole responsibility of the user. All materials may present unknown hazards and should be used with caution. Although certain hazards are described, we cannot be sure or guarantee that these are the only hazards that exist. All products have been classified in accordance with the hazard criteria of the Code of Federal Regulations (CFR) and the SDS contains all the information required by the CFR.

Information on products manufactured by EaCo Chem Inc., which includes brochures, SDS page and product data specifications guidelines are readily available at www.eacochem.com. In addition, hard copies of this information are also available upon request.
