

### EC Jet

The fastest, easiest way to apply NMD 80. The EC Jet is a downstream chemical injector specifically designed to dilute NMD 80 at 4:1 (Four parts water to one part NMD 80)

EC Jet Advantages

### Benefits

The EC Jet sprayer resists corrosion from aggressive chemicals. It comes fully assembled and attaches to the end of a pressure washer wand for downstream injection. When used at low pressure with the close range nozzle, overspray is minimized dramatically.

- **Saves you time and money**
  - Brush-Free application applies NMD 80 in minutes as opposed to hours by brush.
  - Automatically dilutes NMD 80 to the correct water to product ratio.
- **Extends the life of your pressure washer**
  - No chemical goes through the pressure washer.
  - Enables quicker rinse-down.
